Read the Labels. The pure food and drug law was designed for the protection of all, but it only protects those who read labels.

The law prevents false claims—on the labels—not in the advertising. The law makes the label tell if the medicine contains alcohol. Not so in the advertisement.

Read the Label

The law specifies a list of such drugs as are considered dangerous The law specifies a list of such drugs as are considered dangerous unless prescribed by a physician, such as opium morphine, cocaine, acetanelid, canabis indica, chloral, arsenic, strychnine, etc., and makes the LABEL tell if any of them are contained in the medicine. The advertising does not have to. Therefore when buying medicine Read the Label

The next time you are inclined to buy a tonic or a remedy for any of the ills that come from impure, impoverished or acid blood, ask your druggist to let you read the label on a bottle of MILAM. This preparation has no rival. If you suspect any other preparation of being in its class, Read the Label. Look for a guarantee of benefit. Look for ALCOHOL and other dangerous and habit forming ingredients. Any preparation can claim what we claim in their advertising: NONE CAN on their labels.
